

13. A flat sheet made of sturdy material of claim 11 is made of paper.
14. A flat sheet made of sturdy material of claim 11 is made of wood.
15. A flat sheet made of sturdy material of claim 11, further including a handle whereby a human being can grasp said handle to make flat sheet stationary.
16. A flat sheet made of sturdy material of claim 11, further including a plurality of handles whereby a human being can grasp said handles to make flat sheet stationary.
17. A flat sheet made of sturdy material of claim 11 wherein said flat sheet is of rectangular shape.
18. A flat sheet made of sturdy material of claim 11 wherein said cutout areas are shaped as polygons.
19. A Method for applying grout between tile spaces, comprising the steps of:
 - a. Providing a flat sheet with sufficient size to cover a portion of the tiling area, said flat sheet having a cutout area sufficient for grout to pass through.
 - b. Covering top of the tiling area with said flat sheet in a manner such that the cutout area lines up with the spaces between said tiles being laid whereby reducing the chance of grout being applied to other areas other than said tile spaces.
